Re: Commendable Performance on Various Right of Way and Surveying Projects in Region 1

Dear Mr. Stoutenburg:

On behalf of the Colorado Department of Transportation (CDOT) - Region 1, I want to extend our appreciation for the excellent work that has been performed by you and your staff in assisting the Right of Way Unit with various Right of Way and Surveying projects. Every project had considerable magnitudes of complexities: including various field surveying components, Right of Way plans preparation, and Title Services. Without the commitment and dedication of your staff: CDOT would not have been able to meet the Program Delivery dates of every project that your Team participated in.

It has been very gratifying to work with you and your competent staff, a firm that truly understands the Right of Way survey and plan preparation procedures of CDOT. Your understanding of survey law and boundary surveying has been a true asset to CDOT, as can be attested to the successful delivery of every scheduled Project AD date. This level of competency and understanding of CDOT standards has led to minimum interaction from me, therefore allowing me to manage multiple projects without interruption.

Again thank you for your participation and we hope to continue working with you on future projects.

Sincerely,

Corey Guerrero, PLS I
CDOT Region 1 - Right of Way Project Manager
